

Esatto

GRINDER ACCESSORY

Make your great grinder even better with Baratza's innovative Esatto™, an accessory that can turn your Baratza grinder into a real time, weight-based grinding machine.

Set the weight you want and the Esatto does the rest, weighing the ground coffee within a tenth of a gram while grinding, and stopping automatically.

The Esatto is an accessory that is designed specifically for use with your Baratza Encore™, Virtuoso™, or Preciso™. With its easy assembly and simple operation, you will be grinding by weight in minutes.

The Esatto was initially designed for use in a manual brew bar in a café, eliminating the need to manually pre-weigh coffee beans. The built-in precision load cell provides accurate weighting, while grinding, to within 0.1 grams. Three user-

programmable buttons make for repeatable, one-touch grinding.

The Esatto is a perfect way to showcase home brewing methods and equipment. Use the Esatto plus a Baratza grinder on the manual brew bar, and show your customer that they can purchase the grinder, brew method and coffee for use at home.

Digital Control Panel: The front-mounted control panel with LED display is easy and intuitive. Three programmable buttons allow the user to program in the desired weight (+/- 0.1) Simply press the START button, and the Esatto automatically delivers precise dosing.
