How to: Detent Replacement
Sette 30, Sette 270, Sette 270W, Sette 270Wi
Time: 5 min
Difficulty: Easy
Tools/supplies: Paperclip (or any hooked tool). Towel or rag (optional).
Parts: Detent (SKU: 1354)
Additional Resources: n/a

*** Unplug the grinder from power supply ***

Close the hopper gate and clear ground coffee from the system
Set the portafilter hook into the side position by pushing down and swinging it either left or right.

Remove the hopper from the unit by rotating counter-clockwise and lifting up.

Rotate the macro adjustment in the coarse direction past setting 31 until it stops and can be pulled down for removal.
Bend a paperclip into a hook shape or use any narrow, hooked tool.

Use the hook to push down on the top of the detent to remove it.

Repeat to remove the other detent.

Press the new detents into place.
Insert the cone burr holder halfway up into the grinder. Rotate the assembly as needed until the cone burr holder is keyed into the unit.

Line up the blue tab on the adjustment ring with the blue arrow on the case.

Press up on the assembly and rotate the blue tab towards the rear of the grinder.

Install the hopper and return the unit to operation.
