Virtuoso

CONICAL BURR GRINDER

The Virtuoso™ lives up to its name by providing technical skill, classic style and a consistent, quality grind.

Grinding for espresso? Let the Virtuoso's professional-grade 40mm conical burrs perform their magic for a consistent, fine grind. How about a French Press? The Virtuoso can handle that too, with a particle size uniformity that gives you consistency from cup to cup. In fact, the Virtuoso is so consistent at both the coarse and fine ends of the grind range that we consider it to be in a class all by itself – and so do many of the micro- and specialty-roasters who swear by it.

The secret to the Virtuoso's consistent, smooth grind is two-fold: an efficient DC motor keeps your beans cool, even during extended grind times, while a combination of electric and gear speed reducers slow the burr to 450 RPM, ensuring a smooth bean feed and reducing noise, heat and static buildup.

The Virtuoso's exterior is just as finely tuned as its interior – a convenient front-mounted pulse button allows for grinding directly into an espresso filter basket, while a 60-second timer means that it's easy to replicate the ideal grind time. With the Virtuoso, the look goes beyond merely functional. A sculptured metal top and base give this grinder an expensive, elegant image that adds a sense of class and quality to kitchen counters and coffee shop workspaces alike.

When you want it all, the Virtuoso is the grinder that will get you there with function, elegance, and style.

FEATURES

BURRS:

Manufactured in Europe, the Virtuoso's 40 mm conical burrs grind coffee at 1.5 to 2.4 g/sec. depending on the setting. But what really sets the Virtuoso burrs apart is that these burrs can do a very uniform grind, with a distinct lack of fines across its grinding range. So the Virtuoso burrs are exceptional for espresso, drip, manual brewing methods and Press Pot. These conical burrs are durable and will remain sharp for many years. The burrs have a precision mounting system to ensure a stable platform for accurate grinding.

GEARBOX:

The Virtuoso utilizes a simple and efficient direct drive gear reduction transmission to move power from the DC motor to the rotating cone burr. A thermal overload cutout protects the motor from overheating due to excessive use - remember, these grinders are designed to grind a dose at a time for home use!

ACCESSORIES

HOPPER EXTENDER:

An extension that can add 9 oz. of capacity to the existing 8 oz. bean hopper. Several extenders can be added to get to the capacity you need.

GRIND ADJUSTMENT:

Turn the hopper and with 40 settings you can quickly adjust from fine for espresso to coarse for French Press. The grind range is from 200 to 1200 microns.

GRINDS LEFT IN GRINDER:

To maximize freshness, the Virtuoso minimizes the ground coffee left in the grinder.

BREWING METHODS:

The Virtuoso is a great all around grinder, from manual brewing to espresso.

MOTOR:

A powerful, high torque DC motor effortlessly drives the burrs. This motor turns slowly resulting in cool, quiet operation and permits long grinding duty-cycles. The circuitry is equipped with an automatically resetting thermal cutoff switch.

CALIBRATION:

An innovative burr calibration system ensures that each grinder has the full range of grind. If necessary, the grinders can be user calibrated.

SPEED CONTROL:

With unique speed control, the Virtuoso uses a combination of gear and electronic speed reduction to control the rotation of the burr to 500 RPM. This slow speed reduces heat, noise, and static generation in the grinder. It also ensures that the beans feed smoothly into the burrs.

TIMER SWITCH:

The Virtuoso has a 60-second timer with segmented graphics, for easily repeatable grind times.

CLEANING:

Burrs are easily removable with no tools, making cleaning very easy.

PORTAHOLDER:

A replacement for the grounds bin that holds the espresso portafilter for hands-free grinding directly. It also makes for easy clean up.

SPECIFICATIONS

Speed To Grind	1.5g/sec — 2.4g/sec	Power Rating	220-240VAC 50/60 Hz, 80W, 0.5A class II 100-120VAC 50/60 Hz, 70W 0.8A
Burrs	40mm conical burrs	No Load Burr Speed	550 RPM
Bean Hopper Capacity	8oz (227g)	Safety Listing	UL/CSA/CE/EK
Grounds Bin Capacity	5oz (142g)	Designed & Engineered	Seattle, WA
Weight	8lbs (3.6kg)	Manufactured & Assembled	Taiwan
Dimensions W/H/D (cm)	12/35/16	Burr Manufacturing	Etzinger in Liechtenstein
		Certifications	CB, ETL, cETL
